

# ROXUL SAFE™ 55

## Metal Building Insulation

ROCKWOOL ROXUL SAFE™ 55 is a medium-density stone wool insulation for exterior and interior non-load-bearing, steel-faced firewall applications where a fire resistance rating is required. It is approved for use in a 2-hour fire rated system.

Designed to meet building codes in high-density areas, ROXUL SAFE™ 55 is non-combustible, withstanding temperatures up to 2150°F (1177°C), and will not produce toxic smoke or promote flame spread. As a result, it provides high-temperature fire protection, enhancing occupant safety, particularly when a fire separation wall is required.

It is also UL/ULC tested and approved for fire-rated assemblies.

ROCKWOOL offers single- or double-sided fire-rated assemblies. ROXUL SAFE™ 55 is ideally suited for zero lot line applications where buildings are in close proximity and fire safety is essential.

### Fire-resistant Material

A 2-hour fire resistance rating from the interior side allows builders to reduce the required separation between buildings.
